THE ADVANTAGES OF THIS SOLUTION

Minimize Errors
by providing essential
information to the user
in real-time

Optimize your ROI
by improving your
efficiency and
mobility in your
traceability
operations

**Sharing
applications**
by integrating your
business
applications

Better ergonomics
with light, robust
and dexterous
devices

IN A NUTSHELL

- A combined solution with a strong technological partnership.
- The guarantee of a **complete end-to-end solution**.
- A solution via smartphone **to meet all business needs** (calls, emails, etc.) with a single device.

PROGLOVE - for a smarter workforce

ProGlove builds the smallest, lightest, and toughest barcode scanners in the world, connecting workers to the Internet of Things. This promotes human-machine collaboration and drives the digitization of the shop floor. More than 500 renowned organizations in manufacturing, production, logistics, and retail use these smarter workforce solutions. Our technologies enable workers to be more efficient and more empowered. The company employs 200 people from over 30 countries with offices in Chicago, Munich and Belgrade.

CROSSCALL

CROSSCALL, creator of the outdoor mobile technology market, offers waterproof, durable and highly autonomous mobiles and smartphones. The brand designs models perfectly adapted to the hostile and unpredictable environments encountered by athletes and professionals in the field as well as a range of high-performance accessories. The French company, based in Aix-en-Provence, is currently pursuing its international development with a presence in 16 countries around the world.
