Exceptional colour & high productivity

Kemtek distributes Epson Large Format Printers (LFPs) designed to deliver exceptional image quality, outstanding reliability, and high-performance productivity across a diverse range of signage, display, décor, and industrial printing applications. The Epson S Series, V Series, and R Series provide businesses with the flexibility to produce vibrant indoor and outdoor graphics, retail displays, vehicle wraps, wallpapers, promotional materials, and specialty print applications with remarkable precision and consistency.

Built to support both short-run and high-volume production environments, Epson's advanced large format printing solutions combine innovative printhead technology, high-performance inks, and versatile media compatibility to maximise efficiency and minimise downtime. Whether producing striking signage, premium décor, or durable commercial graphics, the Epson S Series, V Series, and R Series empower print service providers to expand their capabilities, enhance profitability, and deliver exceptional results that stand out in competitive markets.

S-Series

Get more from your large format prints

With its dual-printhead design, the Epson SC-S40610 delivers high print quality at a low purchase price. You get precise and accurate printing with its class-leading AD-ATC system and sophisticated media feeding. With the SC-S80610's orange and red, and optional metallic and white inks, the 9/10-colour set produces vivid results for a range of applications – from professional signage to POS and more. Setup is quick and easy, and printers can automatically set the correct media.

R-Series

Unlock new possibilities with resin printing technology

With Epson's innovative resin ink technology, the Epson SC-R Series delivers exceptional print quality across a wide range of applications. You get vibrant colours, sharp detail, and outstanding media versatility, supported by reliable media handling and precision print performance. The resin inks provide enhanced scratch resistance and instant lamination capabilities, making them ideal for demanding indoor and outdoor graphics. Suitable for signage, décor, retail displays, wallpapers, and specialty applications, the R-Series offers a low-odour, water-based solution that combines productivity with environmental consideration. Setup is quick and easy, helping businesses produce high-quality results with maximum efficiency.

SureColor SC-V7000

Experience intuitive printing for fast, high-quality results

The SureColor SC-V7000 has been developed to enable businesses to print faster with a maximum print area of 2.5m by 1.25m. The unique printhead layout enables simultaneous high-speed printing with white ink and varnish. You can also print directly on various media of up to 80mm thickness. The machine automatically adjusts printhead height depending on media thickness and includes a crash sensor.
