Exceptional colour & high productivity

Kemtek distributes Epson SureColor Technical and Photo series printers designed to deliver exceptional precision, outstanding reliability, and high-performance productivity for professional large-format output. The Epson Technical series is ideal for CAD, GIS, architecture, engineering, and construction environments, while the Photo series is engineered for photography, fine art, and graphic production applications where colour accuracy and detail are critical. Together, these ranges provide businesses and creatives with the flexibility to produce high-quality output on demand, reducing outsourcing costs and improving turnaround times.

Built for both production-focused and quality-critical workflows, Epson SureColor Technical and Photo series printers combine PrecisionCore® printhead technology with advanced media handling and intelligent ink systems to ensure consistent, repeatable results. The Technical series delivers sharp line accuracy and reliable performance for technical drawings and plans, while the Photo series produces rich tonal gradations, deep blacks, and exceptional colour fidelity for gallery-quality prints and professional imaging work.

Seamless integration into existing workflows allows both series to support industry-standard design and production software, enabling efficient file handling and streamlined print management. Advanced colour calibration tools ensure accuracy and consistency across every print, while durable pigment ink systems provide long-lasting output with excellent resistance to fading, making them suitable for both indoor display and archival applications.

With a scalable lineup ranging from compact desktop units to high-performance production printers, Epson SureColor Technical and Photo series solutions cater to professionals, studios, and enterprises of all sizes. Whether producing detailed technical plans or high-end photographic artwork, these printers deliver the precision, versatility, and cost efficiency required for demanding print environments.

T-Series

Large format printers for every business

For speed, convenience, versatility, better productivity and cost control, maximise profits by bringing your large format printing in-house.

Architects: display your CAD designs in outstanding detail, with stunning full-colour displays, brilliant detail and sharp photography.

Advertising agencies: make a splash - grab your clients' attention by creating vibrant, customer eye-catching advertisements quickly and seamlessly.

Engineering: print incredible detail, fast. Low costs and high speeds make the T-Series large format printers ideal for engineers.

P-Series

Precision photography. Exceptional colour.

Experience outstanding image quality with Epson's professional SureColor P-Series photo printers. Designed for photographers, artists, and print professionals, the P-Series delivers ultra-accurate colour reproduction, deep blacks, and smooth tonal gradations for gallery-quality output. Print on a wide range of media including fine art paper, canvas, photographic paper, and poster stock while achieving remarkable detail, consistency, and long-lasting results with every print.
