

For Digital Short Run, Packaging, Carton and Label Printing, the Short Answer is HP Indigo Presses

As the pioneers of digital printing, HP Indigo presses continue to set the pace. Digital presses can now match the quality of litho and offset, and are rapidly closing the speed gap.

Kemtek: HP Indigo Sole Distributor

As the proud longstanding sole distributor of HP Indigo in South Africa, as well as other key brands within South Africa's print solution technology sector, Kemtek is at the forefront of the digital printing revolution.

Exclusive Access for Indigo Customers

Our customers enjoy exclusive access to HP Indigo label presses such as the 6K, 8K and 25K models. These deliver premium quality, full-colour bar code labels for industries such as wine exporting, with enhancements that include brand protection and security.

The HP Indigo 18K is a next-generation digital press for folding cartons, enabling printers to capture high-growth opportunities in short-run packaging. It combines advanced automation with uncompromised print quality, helping businesses build profitable operations in the ever-expanding market for customised and on-demand jobs.

The HP Indigo 100K is the world's most productive B2 digital sheet-fed press, delivering non-stop print capabilities at 6,000 sheets per hour. With the HP Indigo 100K, printers can boost margins on existing short runs while unlocking untapped business opportunities.

With the revolutionary HP Indigo 25K model and the HP Indigo Digital Pouch Factory offering, you can produce flexible packaging on demand.

Finishing Products

Complementing HP Indigo presses are specialised finishing solutions designed to extend capability, elevate quality, and unlock new revenue streams. By integrating advanced finishing technologies, printers can deliver standout results across packaging, labels, and commercial applications.

Scodix Finishing

Scodix leads the way in digital embellishment and enhancement, empowering customers to add striking value to printed products — from commercial and packaging differentiation to web-to-print and publishing.

Brotech Finishing

Brotech provides a comprehensive portfolio of converting and finishing systems tailored for labels and flexible packaging. Its modular platforms cover die-cutting, slitting, rewinding, laminating, and inspection, giving printers the flexibility to scale operations while maintaining precision and efficiency. Brotech solutions are designed to streamline workflows, reduce waste, and maximise profitability in high-demand production environments.

Duplo Finishing

Duplo provides innovative finishing equipment for cutting, creasing, folding, and binding, ensuring precision and versatility across commercial, digital, and packaging applications. With automation and precision engineering, Duplo helps businesses achieve consistent quality while reducing manual intervention and turnaround times.
