

Large Format Printing & Cutting

Huge Potential & Expanded Opportunities

Kemtek partners with Epson to unlock the potential of high quality, precision printing outcomes through their range of large format Printers. while also providing Complementary cutting solutions from Aristo cutting tables, Duplo, Summa, , and Caldera digital LFP software, trusted by over 15,000 print providers worldwide.

Exceptional colour & high productivity

Kemtek distributes Large format printers (LFPs) deliver exceptional colour register and high productivity. They provide expanded branding potential in retail and business signage applications, making them a powerful value-add to printshop service offerings.

T-Series

Large format printers for every business

For speed, convenience, versatility, better productivity and cost control, maximise profits by bringing your large format printing in-house.

Architects: display your CAD designs in outstanding detail, with stunning full-colour displays, brilliant detail and sharp photography.

Advertising agencies: make a splash – grab your clients' attention by creating vibrant, customer eye-catching advertisements quickly and seamlessly.

Engineering: print incredible detail, fast. Low costs and high speeds make the T-Series large format printers ideal for engineers.

R-Series

Unlock the potential of resin ink printing

Expect exceptional performance from Epson's first resin ink large-format signage printers: the SureColor SC-R5010 and SC-R5010L. Quick drying with a high scratch resistance, the odourless, water-based ink can be used in sensitive environments like schools and hospitals. Print on everything from vinyl and canvas to wallpaper and film and achieve colour-matching consistency for the entire duration of the print run.

S-Series

Get more from your large format prints

With its dual-printhead design, the Epson SC-S40610 delivers high print quality at a low purchase price. You get precise and accurate printing with its class-leading AD-ATC system and sophisticated media feeding. With the SC-S80610's orange and red, and optional metallic and white inks, the 9/10-colour set produces vivid results for a range of applications – from professional signage to POS and more. Setup is quick and easy, and printers can automatically set the correct media parameters.

SureColor SC-V7000

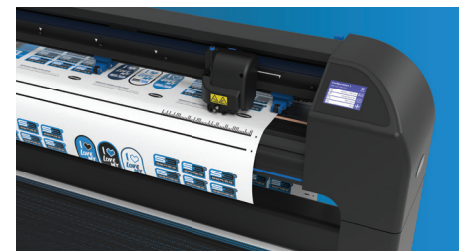

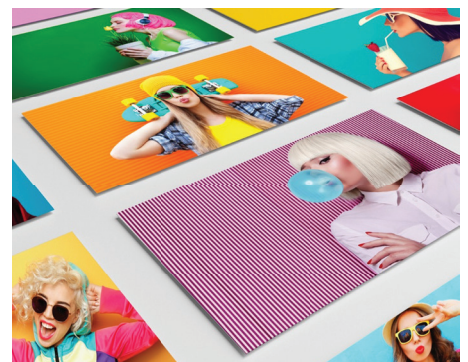

Experience intuitive printing for fast, high-quality results

The SureColor SC-V7000 has been developed to enable businesses to print faster with a maximum print area of 2.5m by 1.25m. The unique printhead layout enables simultaneous high-speed printing with white ink and varnish. You can also print directly on various media of up to 80mm thickness. The machine automatically adjusts printhead height depending on media thickness and includes a crash sensor.

Cutting Solutions

Precision That Powers Production

Kemtek also provides Duplo cutters, Aristo cutting tables and Summa vinyl cutters in support of our large format printers. Aristo flatbed cutting machines have been used successfully for decades for textile materials in the areas of transport, automotive and aviation, both in one-off production and in series production.
